***Allowable Subject Matter***

1. Claims 27-30 and 66 are allowed.

The following is an examiner's statement of reasons for allowance: While the prior art teaches the use of an in-line filter to remove leukocytes from blood, it does not teach or suggest the a platelet container downstream of a primary container, an auxiliary container downstream from the platelet container, with the use of said filter to remove leukocytes from separated platelets. This function is based on the location of the filter between the platelet container and the auxiliary containers. Furthermore, it would not have been obvious to one skilled in the art to combine references because the prior art does not teach the filtration of leukocytes directly from separated platelets.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
